

# SMARTER Video Surveillance

## EXPERIENCE

# Smarter Video Surveillance

Whether you need to cover a single warehouse or a national chain of storefronts, our commercial video surveillance offerings have you covered. Our intuitive app and flexible storage options let you access live or recorded video anywhere, anytime. Advanced features like 24/7 Video Health Monitoring ensure your cameras are always up and running, while intelligent analytics give valuable insight into what's going on at your business.

## One Dashboard, Infinite Possibilities

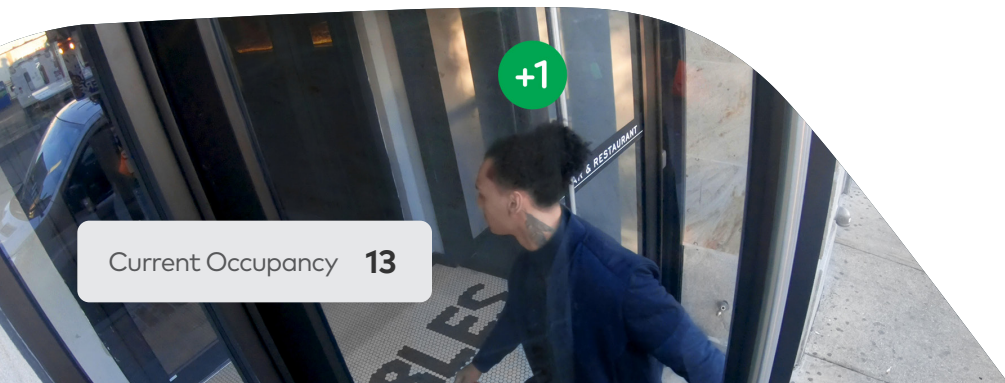

---

For businesses with multiple locations, streamline your video surveillance with one intuitive **Enterprise Dashboard**. Organise multiple locations into a top-down hierarchy of groups, share footage quickly and access video anywhere, at any time, from your phone. Always know what's going on, even when you're on the go.

## Video that Works Smarter

---

Transform the way you protect your business with **Business Activity Analytics**. This powerful feature uses your business cameras to monitor traffic and the movement of people through your business to help you make informed decisions. Monitor multiple locations, create customisable no-go zones and receive real-time alerts if trespassers enter prohibited areas after hours with fewer false alarms. Save time and money with video surveillance that works smarter.

# Keep the Cameras Rolling

---

24/7 Video Health Monitoring ensures your cameras are always online. Keep tabs on the days of recording you're storing and number of video clips uploaded and confirm your camera views are unobstructed with automatically generated video health reports. Don't wait until it's too late to find out something's wrong.

# Better Together

---

All of Alarm.com for Business's security offerings are robust on their own but combine video with access control and intrusion detection for a security system that's more than the sum of its parts. Control all the elements of your security system from one app or web dashboard, find footage you need by searching for important events on your 24/7 video timeline and combine data from across the whole system for valuable business insights.

A man in a dark suit and light blue shirt is seated at a dark wooden table in a dimly lit setting, possibly a cafe or office lounge. He is looking down at a tablet computer he is holding with both hands. On the table in front of him are a clear glass of water and a dark-colored mug. The background features a textured, light-colored wall and a dark leather-upholstered booth.
