LIGHTS & SHADES

Light Up Your Life

Control your lights and shades with Alarm.com for an easy, customised, all-in-one experience.

ALL TOGETHER NOW

Don't complicate your home with extra apps. Alarm.com gives you a better experience with lights and shades that respond to you automatically and a single app to control your whole home.

Control and customise
Set your lights and shades to adjust on a set schedule or when you go to bed. It's easy to light your day, your way.

Light your way home
Don't come home to a dark doorstep. Using Location Services, Alarm.com knows when you're close to home and can turn your lights on automatically before you arrive, ensuring a bright, safe welcome.

Smarter at night
Pair your outdoor lights with Video Analytics technology to have them turn on when your video cameras spot people and vehicles outside, but not animals.

Simplify it with a Scene

Bedtime has never been so easy. A single Scene command can arm your security system, lock your doors, turn off all your lights, and close all your shades—all to your exact specifications.

Use our pre-set Scenes or create your own—it's up to you.

Keep your home and family safer with security that never stops.
