

Smarter Video Alerts

Focus on the activity that matters. Our customisable video alerts show you exactly what you need to see.

KNOW MORE. SEE LESS.

Indoor, outdoor, and video doorbell cameras can show you everything that happens, from every angle. It's a lot of information for you to sort through.

Video Analytics gives you filtered, custom video alerts so that you can focus on the activity that really matters.

Choose what you want to see

Your system can tell the difference between people, vehicles, and animals in your video clips, and alert you—or not—according to your preferences.

Choose where you want to see it

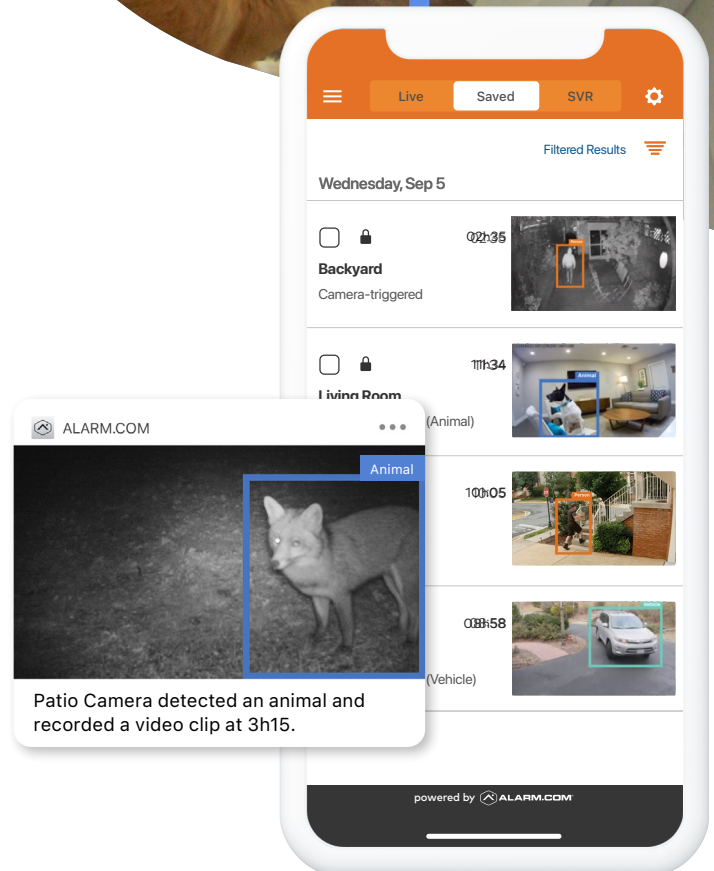

Set up "tripwire" and "ground zone" alerts to capture activity in specific areas. You can pinpoint visitors arriving, vehicles leaving, pets on the couch, and much more.

Don't worry about losing clips

Video Analytics comes with extra storage to ensure you can keep the video footage you need without running out of clips.

Camera. Lights. Action.

Video Analytics improves your outdoor security too. Set your Z-Wave lights to turn on only when a video camera spots a person on your property. You'll deter human intruders, while letting animals go by in the dark.

Keep your home and family safer with security that never stops.
