

Don't Let a Leak Become a Flood

Safeguard your home from the #1 driver of insurance claims with a whole-home water protection solution.

LEAK & FLOOD PROTECTION

A few minutes is all it takes for a leaking pipe or split washer hose to flood your home and cause thousands of dollars in damage.

Rest easy with a water protection solution that detects leaks and shuts them down automatically.

Stop a flood in its tracks

Our Smart Water Valve+Meter spots leaks, alerts you, and turns off your home's water supply to minimise damage.

Safeguard vulnerable areas

Alarm.com powered water sensors are always on guard to catch drips and leaks in hard-to-reach places: under sinks, behind washers, under water tanks—even in your attic.

Save water and money

Everyday water waste costs you money too. Alarm.com alerts you quickly to costly issues like running toilets or excessive water consumption so you can take action and save.

Steer clear of a winter washout

A frozen pipe is a flood waiting to happen. Keep ice out of the picture with your Smart Water Valve+Meter's water temperature monitoring and your system's remote temperature sensors.

If your home needs a blast of emergency heat during the next big freeze, you'll know.

Keep your home and family safer with security that never stops.
